job title North Manchester General Women and Children's Hospital, Crumpsall.
client Integrated Health Projects (Sir Robert McAlpine and VINCI Construction UK).
value £56,000.
programme 3 weeks.

detail The project comprised the manufacture and installation of the main reception desk in addition to a number of nursing station desks. The works took place over three floors of this project. The design of some of the desks as a boat feature for the children's area provided a unique manufacturing brief. The desks required manufacturing to meet current legislative standards for access and functionality whilst maintaining a friendly and relaxing feature for the children. The manufacturing and assembly details were left to RW Joinery to design using painted and laminated materials, trimmed with American White Ash.
